Introduction

In this page, you will find information about the series of **research seminars** organised by the [edTech](#) and [Interactive technologies](#) research groups at the School of Computing, University of Eastern Finland. A research seminar meeting usually consists of 2-3 presentations/talks or other activities. A research seminar presentation typically lasts 20-45 minutes, followed by 10-15 minutes discussion. The research seminars provide an excellent opportunity for doctoral and master students, post-doc/senior researchers and visitors outside of UEF to present their research work, as well as receive questions/comments, constructive feedback, and suggestions from the seminar participants. Doctoral students in UEF are able to earn ECTS credit points by giving presentations and participating to the research seminar meetings.
