Upload Video

Click here to select videos or drag and drop them to be uploaded

Powered by Planet eStream © Copyright © Planet Enterprises Ltd Terms of use

If you are member of UEF staff you can choose before uploading how do you want your video to be seen. Options include "**Personal and Embedded**" and "**UEF Content**". "UEF Content" means the video is visible to all users who are logged in to media.uef.fi service.

Students can upload only by using publishing policy "Personal and Embedded". Students can share these videos by link or by embedding them to another systems like Office 365 or Moodle.

By default video filename becomes the title of the video. You have to add a description for the video as well.

Options

Select the Publishing Policy for the Recording to be added to.

Select to make the content private

Private

Copy Only

Check this option if the content you are uploading is encoded with H264 and AAC Audio

Copy Only

Personal and Embedded content (very near to password protection using traditional systems):

- Recording is visible only to you, not for other users.
- Search function cannot find the recording and it's not listed in channel listings inside the service.
- You can share the recording by using **Share by embedding or Share by web link** -functions.

UEF Content

- The recording is visible for you and for all UEF users.
- Media search can find the recording by using basic and metadata. Recording is listed to those channels it is added to.
- If you want to share the recording for other users you can use embed or web link sharing options in a similar way as with Personal and embedded content.

After choosing the options select "Start Upload". You videos will upload to media server and system runs necessary conversions to play the recordings. After that you can share the recordings as you wish.
